The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). **AMENDMENTS** 3. #### **DETAILED ACTION**

## Information Disclosure Statement

The information disclosure statement (IDS) submitted on 09/16/2003 is being considered by the examiner.

## Response to Arguments

Applicant's arguments filed August 30, 2007 have been fully considered but they are not persuasive. On pages 3-4 applicant argues that Daniels fails to disclose "a first program reproduction device and a second reproduction device adapted to reproduce programs for viewers and users" as recited in Claim 1. Daniels discloses a system with various reproduction devices as seen in Figures 4-6 and described in Column 17 Lines 63+ through Column 18 Liners 1-8. It is additionally taught by Barton the use of various reproduction devices as seen in Figure 2 and described in Column 4 Lines 15-33. The system provides various reproduction devices to be used for efficient and effective recording of the data and thereby meets the limitation.

Additionally, applicant argues on pages 4-5 that Daniels in view of Barton fails to disclose a "live-pause" feature. Daniels discloses in Column 4 Lines 11-23 the ability for the user to pause TV in order to process a computer request (i.e. URL). The live-pause provides the user to pause live TV and thereby access the TV when the user is ready for continuing to watch the show. It is additionally, stated that Barton discloses a live-pause feature as described in Column 6 Lines 47+ and thereby meets the limitation of "live-pause." Additionally, if the user desires to watch live TV after the pause event the user can select "Live TV" and be sent to currently broadcasted TV program.

On page 5 applicant additionally argues that Daniels in view of Barton in further view of Block fails to disclose a "master reproduction device to control playback of selected program." As described by Block in Column 4 Lines 13+ describes the control of the devices for reproduction purposes and thereby meets the limitation. Although, all of applicants points are understood the examiner can not agree and therefore the rejection is maintained.
